

DEEPANSHU SONI

Ghaziabad , 201005 | 8595408696 | deepsoni871@gmail.com

Summary

Backend Developer with 2.3+ years of experience specializing in Python, Django, and FastAPI. Proven expertise in building scalable REST APIs, real-time systems with WebSockets, and JWT authentication. Successfully delivered production level projects in e-commerce, healthcare, and social media domains, leveraging Redis caching, Celery, and database optimization to enhance performance.

Work Experience

Software Engineer Triazine Software Pvt. Ltd	07/2022 to 10/2024 Noida
- Developed and optimized REST APIs using Django REST Framework for scalable backend systems in e-commerce and healthcare domains. - Designed and maintained production-level applications, implementing authentication and authorization using JWT and role-based access control. - Built and optimized database queries using MySQL and ORM, integrating asynchronous processing with Celery for background tasks. - Utilized Redis for caching and performance optimization, handling data processing and edge cases with Pandas. - Collaborated with teams using Git and GitHub for version control, documenting and testing APIs with Swagger and Postman.	

Skills

- Python - Django Framework - Django REST Framework - FastAPI - MySQL - PostgreSQL - Caching - Redis - Celery	- WebSockets - Django Channels - JWT Authentication - Git and GitHub - AWS - Docker - CI/CD - Jenkins - AI API integration
---	--

Projects

Scalable Social Media Backend (Self Project) - Built a social media backend using Django REST Framework with real-time chat, notifications via WebSockets. - Implemented JWT-based authentication and dynamic one-to-one chat rooms. - Developed feed system with post creation, likes, comments, and pagination. - Designed chat inbox with latest message and unread message count functionality. - Implemented message seen status and real-time updates using Django Channels. - Optimized APIs and database queries for better performance.
AI Backend Assistant (Self Project) - Developed AI-powered backend APIs using FastAPI integrated with Google Gemini. - Implemented Redis caching to improve performance and reduce response time. - Designed rate limiting to control API usage. - Structured project using modular architecture (routes, services, utils). - Implemented request validation using Pydantic and proper error handling.
ConsciousRoot Marketplace (Company Project) - Developed REST APIs for product management, cart, wishlist, and order processing. - Implemented role-based system (Admin, Vendor, Affiliate, User). - Optimized homepage APIs using Pandas and handled edge cases. - Built a commission management system between vendors and affiliates.

Healium (Company Project)

- Developed backend for healthcare management system for health camps.
- Managed patient records, doctor consultations, prescriptions, and reports.
- Built APIs for tracking medical data and follow-up treatments.

Anchal (Company Project)

- Developed backend system for pregnancy tracking and healthcare monitoring.
- Managed Asha worker workflows, hospital data, and delivery tracking.
- Built APIs for patient registration, checkups, and health reporting.

Education

Indira Gandhi National Open University
Master of Computer Applications (MCA)
Completed: 2022

Bachelor of Computer Applications (BCA)
Completed: 2021

Accomplishments

- Django REST Framework - Udemy (2025)
- Build REST APIs with Django REST Framework & Python - Udemy (2025)
- FastAPI with OAuth & JWT Authentication - Udemy (2025)
- Python & Django Web Development Completed with Grade A - Ducat Noida (2020)
